Unity Camp 26 April 2024

Despite the challenging weather conditions, the Unity Camp held on April 26, 2024, was an exhilarating event for amateur radio enthusiasts. With temperatures soaring to 40 degrees Celsius, 15 dedicated operators gathered to hone their high-frequency (HF) communication skills. This outdoor campaign provided the perfect setting for participants to construct stations and antennas, testing their abilities in real-world scenarios.

Each operator brought their unique expertise and creativity to the table, collaborating and sharing knowledge to overcome the harsh climate. This hands-on experience not only improved their technical skills but also fostered a sense of camaraderie and teamwork among the group. The camp served as a testament to the resilience and passion of amateur radio operators, proving that even extreme weather cannot dampen their enthusiasm for communication and learning.

Participants

S21KMK, S21AMD, S21HD, Arju, S21KV, S21DW, S21BK, S21NZ, S21FIA, S21ARK, S21IT, S21IM, S21BP
